INDEX

Page numbers of regular articles are given in **boldface** type

aberrant segregation ratios in *Tribolium castaneum*, 950
acute irradiation effects on number of young and litters born for mice of different strains, 955
ADAMS, J. T., 937
adaptability in heat tolerance, heterosis, mice, **427**
ADELBERG, EDWARD A., genetic transposition in a strain of *Escherichia coli*, **577**
adenine-resistant mutant of poliovirus, 947
ADLER, HOWARD I., genetic analysis of radiation response in *Escherichia coli*, **701**
age of RBC donors and the immunological differences in genetically isolated lines of domestic turkeys, 989
AHLOOWALIA, B. S., 937
AHUJA, MULKH RAJ, cytogenetic study of heritable tumors in Nicotiana species hybrids, **865**
AKEY, ALICE, 937
aleurone color inhibitor, mutant, maize, **779**
ALEXANDER, MARY L., biological damage in mature sperm of *Drosophila virilis* in oxygen and nitrogen, dose intensities of gamma rays, **71**
  recovery mechanisms and oxygen, effects upon changes in radiation sensitivity in sperm treated in mature males and fertilized females, Drosophila, **1505**
ALLARD, R. W., nonallelic gene interactions in inheritance of quantitative characters in barley, **899**
allelic complementation among *ad-3B* mutants of Neurospora, factors influencing, 972
ALLEN, COURTNEY P., B blood group system, effects of two heterozygous genotypes on survival and egg production of multiple crosses, chickens, **1711**
ALLEN, SALLY LYMAN, 938
ALTENBURG, EDGAR, 938, 945
  mutagenic equivalence of continuous and intermittent ultraviolet in *Drosophila melanogaster*, **273**
  proportionality between mutation rate and ultraviolet dose after photoreactivation in Drosophila, **361**
altered proteins produced by mutation at amination locus in Neurospora, 941
amphiploid, synthetic, comparative genetics, cotton, **45**
ANDRESEN, E., 940
aneuploidy in *Collinsia heterophylla*, 954
Arabidopsis, supervital mutants, **443**
ARAKAKI, DAVID T., 939
ARDITTI, RITA R., modification by manganous chloride of frequency of mutation induced by nitrogen mustard, **761**
ARMSTRONG, F. B., mutants of Salmonella deficient in reductoisomerase, **1581**
Artemia salina gynandromorph, **277**
asci with nonidentical sister spores in *Neurospora crassa*, **1187**
Aspergillus, color mutants, 943, **1139**
asynapsis and mutability in *Drosophila melanogaster* **337**
asynapsis in interchromosomal effects on crossing-over in *Drosophila melanogaster*, 989
asynchronous meiotic chromosome rhythm as a cause of sterility in Triticale, 988
atherosclerosis resistance and susceptibility in pigeons, 958
AUBERTIN, MARY, multiple differentiation of plasmons of diploid species of Solanum, **1321**
Avena, spontaneous aneuploids, 969
average recombination per chromosome, **407**

back mutation in *Drosophila melanogaster*, yellow and white mutants, **483**
BACON, D. F., 939
bacteria, enteric, sexual recombination in, **1427**
bacteriophage, genetic recombination, test of a current theory, **187**
  mutations induced, 968
  spontaneous production of lambda particles with transducing activity, **255**
  T4D, mapping, *r* mutants, **179**
  T4*r*II mutant reversions, induced, 965
BAILEY, D. W., 939
BAKER, L. H., 939
BAKER, L. N., 940
BAKER, LAURENCE H., 949
BAKER, RACHEL M., 963
BAKER, WILLIAM K., dichotomous action of Y chromosomes on expression of position-effect variegation, **1399**
BALABAN, GLORIA, 974
balanced genetic loads in Drosophila, **1027**
BALBINDER, ELIAS, 940
BALBINDER, E., fine structure of loci *tryC* and *tryD* of *Salmonella typhimurium*, order of mutational sites, three-point transduction tests, **469**
  fine structure of loci *tryC* and *tryD* of *Salmonella typhimurium*, reversion patterns and behavior of specific alleles during recombination, **545**
BAND, H. T., 941
BANGHAM, JEAN W., 981
BARKER, J. S. F., selective matings using yellow mutant of *Drosophila melanogaster*, **623**
barley, developmental genetics of a mutant, 994
  nonallelic gene interactions in inheritance of quantitative characters, **899**

BARNETT, W. EDGAR, 941
BARRATT, RAYMOND W., 941
BARRY, E. G., 942
BAUSUM, HOWARD T., mutations from streptomycin dependence to independence in *Salmonella typhimurium*, **1475**
B blood group system, effects of two heterozygous genotypes on survival and egg production, chicken, **1711**
B blood groups in swine, 940
BEASLEY, A. B., mutation and recombination in vicinity of a complex gene, **285**
BEATTY, A. V., 942
BEATTY, J. W., 942
BECK, N. J., 939
BECK, SIDNEY L., 942
BECKER, W. A., 943
BELL, A. E., 969, 995
BENDICH, A., 948
BENNETT, DOROTHEA, mutation and recombination in vicinity of a complex gene, **285**
BERG, CLAIRE M., 943
color mutants of *Aspergillus fumigatus*, **1139**
BERGENDAHL, JANET, biological damage in mature sperm of *Drosophila virilis* in oxygen and nitrogen, dose intensities of gamma rays, **71**
BERNSTEIN, HARRIS, 964
BIANCHI, A., 943
biological damage induced by gamma rays in mature sperm of *Drosophila virilis*, effect of oxygen and nitrogen, **71**
biosyntheses of pantothenate homologs, **953**
BIRD, MARGARET A., cytochrome c oxidase activity and mutability in two strains of Drosophila, **99**
blood group gene frequencies, correlated reponses, with selection for body weight and egg weight in fowl, 945
BODMER, WALTER F., 944
body and tail length differences between yellow and nonyellow mice in parabiosis, 994
BOLE-GOWDA, B. N., crossing-over and interference in centromere region of linkage group I, Neurospora, **1243**
BONNER, D. M., 989
BOWEN, SARANE THOMPSON, gynandromorph of the brine shrimp, *Artemia salina*, **277**
BOYER, HERBERT, direct selection of L-arabinose negative mutants of *Escherichia coli*, strain B/r, **417**
BRAYMER, H. D., 944
brine shrimp gynandromorph, **277**
BRINK, R. ALEXANDER, continuous variation in level of paramutation at *R* locus in maize, **1053**
twin mutations in medium variegated pericarp maize, **489**
BROOKS, MARGARET H., free amino acids in anters of fertile and genetic cytoplasmic male sterile Sorghum, **1629**
BROSSEAU, GEORGE E., somatic crossing-over and elimination of ring X chromosomes, *Drosophila melanogaster*, **1573**
BROWN, RUSSELL V., 945
BROWN, SPENCER W., somatic crossing-over and elimination of ring X chromosomes, *Drosophila melanogaster*, **1573**
BROWNING, LUOLIN S., 938, 945
mutagenic equivalence of continuous and intermittent ultraviolet in *Drosophila melanogaster*, **273**
proportionality between mutation rate ultraviolet dose after photoreactivation in Drosophila, **361**
BUIATTI, M., 943
buphthalmos in the rabbit, **519**
BURDICK, A. B., 945, 990
recombinational structure and complementation relationships in *m-dy* complex of *Drosophila melanogaster*, **503**
BUTLER, L., 946

carbon dioxide sensitive Drosophila, eggs treated with X-rays and ultraviolet, 983
careener, unbalanced locomotion in mice, **435**
CARLSON, E. A., comparison of micromaps obtained by direct and indirect methods of recombination in dumpy region of *Drosophila melanogaster*, **1017**
mutagenesis of the dumpy locus in *Drosophila melanogaster*, mosaicism induced by monofunctional alkylating agent, **561**
comparative mutagenesis of dumpy locus, *Drosophila melanogaster*, X-ray treatment of mature sperm—frequency and distribution, **321**
CARSON, H. L., 946
CASE, MARY E., 946
CASPAR, A. L., 946, 992
cat, X chromosome differentiation, coat patterns, 973
cattle, multiple alleles at the *J* locus, **797**
cell renewal in squamous epithelium of the mouse forestomach, 994
cellular antigens in species hybrids of Columbidae, interaction of nonallelic genes, **1409**
cellular antigens in species hybrids, Columbidae, 975
CENTER, E. M., 947
CHAI, C. K., inheritance of careener, unbalanced locomotion in mice, **435**
CHANDRA, H. SHARAT, inverse meiosis in triploid females of mealy bug, *Planococcus citri*, **1441**
CHAPIN, MARGARET, 947
CHIANG, MORGAN S. M., inheritance of careener, unbalanced locomotion in mice, **435**
chicken, selection for body weight and breast angle, **1313**
Chlamydomonas, linkage maps, **531**
nonmapable unit factor, 982
streptomycin resistant mutants, origin of, **1463**
cholesterol metabolism in the rabbit, 988
CHORAZY, M. R., 948
CHRISTIAN, LAWRENCE C., 987
chromosomal aberration gradient in sectioned anther material, 942

chromosomal analysis, normal and mongoloid individuals of ethnic groups in Hawaii, 939
chromosomal rearrangements, effects on a protein, Drosophila, **999**
chromosome complements of turkey and pheasant compared with chicken, 987
chromosome maps of Saccharomyces, 963
chromosome pairing in interspecific hybrids, analysis Nicotiana hybrids, **1171**
chromosome pairing in interspecific hybrids, probability distributions, **1163**
chromosome replication in *Bacillus subtilis*, 996
chromosome staining, modified technique for, 968
chronic gamma radiation effect on proembryos of corn, 992
CHU, ERNEST H. Y., 948
CHUNG, C. S., relative genetic loads due to lethal and detrimental genes in irradiated populations, *Drosophila melanogaster*, **1489**
CHURCH, T. A., 976
CLANCY, C. W., 948
CLARK, EVELYN, 974
CLARKE, C. A., *Papilio dardanus*, Brown, data on race *ochracea*, race *flavicornis*, and further information on races *polytrophus* and *dardanus*, **909**
CLARKSON, THOMAS B., 955, 958
Cochliomyia, female, radiosensitivity of developing reproductive cells, **721**
COE, E. H., JR., 978
spontaneous mutation of aleurone color inhibitor in maize, **779**
COHEN, JUDITH, position-effect variegation at closely linked loci in *Drosophila melanogaster*, **647**
Collinsia, radiation induced translocations, **461**
color mutants in *Aspergillus fumigatus*, 943
color mutants of *Aspergillus fumigatus*, genetic analysis, **1139**
color polymorphism in *Drosophila l. lebanonensis*, **1275**
Columbidae, cellular antigens, interaction of nonallelic genes, **1409**
transferrin variation, **1385**
comparative genetics of *Gossypium hirsutum* L. and the synthetic amphiploid, *G. arborium* L × *G thurberi* Tod, **45**
complementation and biochemical relationships between *Td* mutants in *Neurospora crassa*, 966
complementation enzyme in tryptophan synthetase system of Neurospora, 988
complementation, mutation and enzyme alteration in tryptophan synthetase system of Neurospora, 989
components of a mutable system in maize, 976
components of fitness which measure genotype-environment interrelationships in *Drosophila melanogaster*, 964
COMSTOCK, R. E., 949
CONNEALLY, P. M., multiple alleles at the *J* locus, cattle, **797**
CONSTANTIN, M. J., 974
COOK, ANN, recombination studies of lactose nonfermenting mutants of *Escherichia coli* K-12, **1335**
COPELAND, JAMES C., genetic analysis of radiation response in *Escherichia coli*, **701**
corn, chronic gamma radiation effect on proembryos, 992
components of a mutable system, 976
continuous variation in level of paramutation, **1053**
control of gene action in synthesis of pH 7.5 esterase, **1609**
gene-action sequence in anthocyanin synthesis, 978
linkage in autotetraploid, **367**
mutation of aleurone color inhibitor, **779**
mutations induced, 946
nitrate-reductase activity, 966
recombination frequency in presence of B chromosome, 943
twin mutations, medium variegated pericarp, **489**
waxy, intralocus recombination frequency estimates, **737**
white-albino loci, 180
correlation between heterozygote and homozygote viabilities and nature of the genetic load in natural population of *Drosophila melanogaster*, 941
cotton, comparative genetics of *G. hirsutum* L. and a synthetic amphiploid, **45**
flowering response, photoperiodism, **1535**
linkage-block break up enhanced, **61**
pigment glands, distribution in cotyledons and leaves, **131**
COX, D. F., genetic effects of irradiation on early mortality in swine, **785**
paternal irradiation effect on 154 day weight in swine, **1639**
crossing-over and interference in a multiply marked chromosome arm of Neurospora, **1253**
crossing-over and interference in centromere region of linkage group I, Neurospora, **1243**
crossing-over frequency in Neurospora, genetic factors influencing, **839**
crossing-over in third chromosome, effects of compound and ring X chromosome on, Drosophila, **305**
crossveinless polygenes in 40 wild lines of *Drosophila melanogaster*, 971
cysteine mutants of *Salmonella typhimurium*, **1617**
cytochrome c oxidase activity and mutability in two strains of Drosophila, **99**
cytogenetic, biochemical and radiobiological investigations in *Haplopappus gracilis*, 964
cytogenetic partitioning of quantitative genetic expression, model for, 982
cytogenetic study of radiation-induced translocations in *Collinsia heterophylla*, **461**
cytological analysis of stocks of *Drosophila melanogaster* derived by unequal crossing-over at or near white locus, **1393**

cytological demonstrations of induced breakage in somatic chromosomes of Drosophila, 974

DAVIS, R. H., 949
consequences of a suppressor gene effective with pyrimidine and proline mutants of Neurospora, **351**
DAWSON, PETER S., 950
DEFRIES, J. C., 950
DE GIOVANNI-DONNELLY, ROSALIE, 996
DELANKO, RONALD J., 968
delimitation of chromosomal regions involved in V-type position effects from X autosome translocations in the mouse, 981
DEL VAL REUTER, SISTER MARY, I. H. M., exchanges induced in different X chromosome regions after X-raying oocytes, Drosophila, **1663**
DEMEREC, M., cysteine mutants of *Salmonella typhimurium*, **1617**
density gradient studies with adenylosuccinase from interallelic heterocaryons in Neurospora, 944
DE SERRES, F. J., 941, 950, 972
relative frequencies of X-ray-induced viable and recessive lethal mutations in *ad-3* region of *Neurospora crassa*, **793**
developmental genetics of the agropyroides mutant in barley, 994
DEWITT, SUSANNE K., genetic transposition in a strain of *Escherichia coli*, **577**
DHILLON, T. S., 954
cytogenetic study of radiation-induced translocations in *Collinsia heterophylla*, **461**
differentiation in natural populations of *Justicia simplex*, **789**
distorted sex ratio in offspring of attached-X females in *D. melanogaster*, 971
distribution of pigment glands in cotyledons and leaves of upland cotton, **131**
distributive pairing in secondary nondisjunction, 956
DNA, genetic mapping, influence of mutated configuration on frequency of recombination along length of molecule, **1369**
DNA, integration and expression of different lengths, during transformation of pneumococcus to erythromycin resistance, **1355**
DNA measurements of chromosomes, including the Philadelphia[1] chromosome, in human chronic granulocytic leukemia, 981
DNA recovery from the effects of alkylation, 987
DNA replication and UV-induced mutation, bacteria, **1125**
DAVIS, ROWLAND H., relationship between gene suppression and aspartate transcarbamylase activity in *pyr-3* mutants, Neurospora, **1075**
DOBZHANSKY, THEODOSIUS, balanced genetic loads in Drosophila, **1027**
dopa oxidase activity in *Drosophila melanogaster*, dominant second chromosome factor regulating, 967
DORN, GORDON L., recombinational structure and complementation relationships in *m-dy* complex of *Drosophila melanogaster*, **503**
dose effect of *ma-l*$^+$ and *ry*$^+$ on xanthine dehydrogenase activity in *Drosophila melanogaster*, 956
DOUDNEY, C. O., ultraviolet light induced mutation and deoxyribonucleic acid replication in bacteria, **1125**
Drosophila, additional loci affecting xanthine dehydrogenase, 965
asynapsis and mutability, **337**
back mutation, yellow and white mutants, **483**
balanced genetic loads, **1027**
changes in radiation sensitivity, sperm treated in males and in fertilized females, **1505**
components of fitness, 964
compound and ring X chromosomes, effects on crossing-over in the third chromosome, **305**
crossveinless polygenes, 971
cubitus interruptus, selection, 960
cytochrome c oxidase activity and mutability, **99**
distorted sex ratio, 971
distribution of *cve* polygenes, **261**
distributive pairing in secondary nondisjunction, 956
DNA-associated RNA, relationship with euchromatic and heterochromatic derived DNA, 970
dopa oxidase activity, 967
dumpy locus, mosaicism induced, **561**
duplicational origin of reverse mutations, forked locus, 938
early induced mortality, 970
ebony[11], relative fecundity, 972
effects of chromosomal rearrangements on a protein, 999
eye phenotype requiring temperature, **587**
female fecundity, 990
fourth chromosomes from natural populations, 959
frequency and distribution of induced mutations, dumpy locus, **321**
frequency-dose relation, X-ray-induced Y-suppressed lethals, **397**
frequency of sterility in laboratory population, **1519**
gene dosage, 954
gene dosage and dehydrogenase activity, 956
gene pleiotropy, 986
genetic load and heterozygote and homozygote viabilities, 941
genetic loads, irradiated populations, **1489**
heritable melanotic tumors after feeding on extracts, 951
heterozygous inversions, effect on primary nondisjunction, **1301**
induced dominant lethal frequencies modification, 991
induced exchanges in X chromosomes following X-raying of oocytes, **1663**
induced mosaic mutations, 975

induced translocations and crossing-over, 963
interchromosomal effect on crossing-over 959, 989
interchromosomal effects, 980
interchromosomal genotypic interacters, **1557**
in vitro complementation between nonallelic genes, 954
irradiation effects on genetically coadapted systems, **1647**
irradiation of eggs from carbon dioxide sensitives, 983
maternal effect transfer by injection, **847**
m-dy complex, recombinational structure and complementation, **503**
m-dy locus, mutant elements, 945
mesonotal color polymorphism, **1275**
micromaps of the dumpy region, **999**
monogenic polymorphism, 976
mutagenic equivalence of continuous and intermittent ultraviolet, **273**
mutant affecting pteridine metabolism, **109**
mutant similar to eyeless, 951
mutation rate and ultraviolet dose, proportionality after photoreactivation, **361**
mutations induced by monofunctional quinacrine mustard, mosaicism, 945
notch-deformed, head abnormality, temperature sensitive period, **11**
oxygen and nitrogen effect on induced biological damage, **71**
polygenic systems, 972
polyspermy, 958
position-effect variegation, **647**
position-effect variegation, dichotomous action of Y, **1399**
protein differences, 961
pseudoallelism, Notch, **743**
radiation, effects on egg production, 950
relation between crossing-over and nondisjunction, interchromosomal effects, **1691**
selection and body size, **209**
selection for parthenogenesis, 946
selective matings using yellow, **623**
secondary nondisjunction, role of distributive pairing, **1737**
sex peptide of males, 953
somatic chromosome breakage, 974
somatic crossing-over and elimination of ring X chromosome, **1573**
specific modifier of w^{ea}, 948
sperm transfer, storage, displacement, utilization, **1719**
temperature effect on pattern of insemination, 963
temperature effects and segregation, 997
tryptophan pyrrolase, **807**
unequal crossing-over at or near white locus, cytological analysis, **1393**
variegation suppressor, 986
V-type position effects, **25**
yellow region, minute chromosomal changes induced, 953

DRUGER, MARVIN, selection and body size in *Drosophila pseudoobscura* at different temperatures, **209**
dual function of the *pyr-3* locus of Neurospora, 949
DUBES, G. R., 947
DUNN, L. C., mutation and recombination in vicinity of a complex gene, **285**
duplicational origin of reverse mutations at forked locus in Drosophila, 938

EATON, N. R., 981
EBERHART, BRUCE M., 951
EBERSOLD, W. T., linkage maps in *Chlamydomonas reinhardi*, **531**
EDGAR, R. S., critical test of a current theory of genetic recombination in bacteriophage, **187**
mapping experiments with *r* mutants of bacteriophage T4D, **179**
EDINGTON, C. W., frequency-dose relation of X-ray-induced Y-suppressed lethals, Drosophila, **397**
EDWARDS, JAMES W., 951
effect on fruit size of genes on chromosome 2 of tomato, 946
effects of compound and ring X chromosomes on crossing-over in the third chromosome, *Drosophila melanogaster*, **305**
effects of heterochromatic-euchromatic rearrangements on a protein in *Drosophila melanogaster*, **999**

FLING, MARGUERITE, 960
FLORY, W. S., 952
FOGEL, S., 962, 967
FOLSOME, C. E., 952
specificity of induction of T4*r*II mutants by ultraviolet irradiation of extracellular phages, **611**
FORBES, CLIFFORD, effect of heterozygous inversions on primary nondisjunction of *Drosophila melanogaster*, **1301**
forward and reverse mutations induced with ethyl methanesulfonate and nitrous acid in *Neurospora crassa*, 946
fourth chromosomes from natural populations of *Drosophila melanogaster*, 959
FOX, A. S., 953
immunochemical analysis, effects of heterochromatic-euchromatic rearrangements on a protein in *Drosophila melanogaster*, **999**
FRANKEL, RAFAEL, graft induced transmission to progeny of cytoplasmic male sterility in Petunia, **641**
free amino acids in anthers of fertile and genetic cytoplasmic male sterile Sorghum, **1629**
frequence-dose relation of X-ray-induced Y-suppressed lethals, Drosophila, **397**
FRIIS, J., 981
FRYE, SARA H., 953
FUERST, R., 953
FUSCALDO, KATHRYN E., immunochemical analysis, effects of heterochromatic-euchromatic rearrangements on a protein in *Drosophila melanogaster*, **999**

gamma globulin isoantigen (allotype) in mouse, 995
gamma radiation, effects on woody plants, 952
GARBER, E. D., 943, 954
color mutants of *Aspergillus fumigatus*, **1139**
cytogenetic study of radiation-induced reciprocal translocations in *Collinsia heterophylla*, **461**
GARDNER, ELDON J., 951
new eye phenotype in *Drosophila melanogaster* expressed only at temperatures above 25°C, **587**
reconsideration of maternal effect transfer by injection, *Drosophila melanogaster*, **847**
GARNJOBST, LAURA, temperature independent mutation at *rib-1t* locus in *Neurospora crassa*, **281**
GAY, HELEN, 937
GEERAETS, W. J., 962
gene action in polygenic systems of Drosophila, 972
gene decreasing ascospore yield in *Neurospora tetrasperma*, 960
gene pleiotropy in morphogenetic processes of Drosophila, 986
gene suppression and aspartate transcarbamylase activity in *pyr-3* mutants of Neurospora, relationship between, **1075**
genetically controlled head abnormality, *Drosophila melanogaster*, temperature sensitive periods during the development, Notch-deformed, **11**
genetically controlled response to the drug chlorpromazine, 962
